## **DETAILED ACTION**

## Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

There are three distinct species regarding the stages of the gear box; single-stage (A), two-stage (B) and three-stage (C) gear boxes.

Within the two-stage gear box species there are two further subspecies; a gearbox with TP kinematics (D) and a gearbox with SP kinematics (E).

Further within the two-stage gear box species there are two other subspecies; the ring wheel of  $H_{an}$  connected fixedly to  $H_{ab}$  (F) and the ring wheel of  $H_{an}$  connected to A3 (G).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Application/Control Number:

10/519,667 Art Unit: 3726 Page 3

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Species A, Claim 17 Species B, Claims 18, 20-24, 26 and 27 Species C, Claims 19, 25 and 28-30

Applicant must elect one of A, B and C above. In the event that applicant elects Species B, applicant must make further elections, one from Species D and E and one from Species F and G:

Species D, Claim 23 Species E, Claim 24

Species F, Claim 26 Species G, Claim 27

The following claim(s) are generic:

Claim 16 is generic to all the Species, claims 18, 20 and 22 are generic to Species B.

- 3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:
- 4. As can be seen from figure 1, the three different stage gear boxes have different methods of assemble and therefore are distinct from one another.

Applicant is to be made aware that the claims as currently presented are ambiguous and/or indefinite for the following reasons:

Claim 16 recites that one subassembly (H<sub>an</sub>) is joined to at least two other subassemblies. However, dependent claim 17 is a method of making a single-stage gearbox which is assembled without (H<sub>an</sub>) (see figure 1) and thus contradicts the language of claim 16. To further complicate the claims, claim 18 is dependent from claim 17 despite the fact that the components of claim 17, specifically A1 are not used in claim 18 because a two-stage gearbox is being described. These are only two examples of the various incongruities existing in the claims, applicant is strongly advised to amend the claims to more clearly recite the limitations of the invention in

Application/Control Number:

10/519,667 Art Unit: 3726

response to this office action in order expedite prosecution of the instant application on the merits.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher M. Koehler whose telephone number is (571) 272-3560. The examiner can normally be reached on Mon.-Fri. 7:30A-4:00P.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bryant can be reached on (571) 272-4526. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
